

## *PA- Supplemental Guidance*

**ANM-12** **Shallow water habitat** – These “vernal pools” do **not** have water in July and August in most years.

Note – when scheduling this enhancement, keep in mind that the “vernal pool” will need to be designed, constructed, and managed in areas consisting of soils with low permeability or seasonal high water tables.

Permitting will be needed unless producer is willing to locate “vernal pool” on currently cropped acreage. The site should be evaluated for acceptability before agreeing to the enhancement.

### Cropland - Actual/acre

Not compatible with ANM01, ANM02, RCCR99, PLT06, PLT08, SOE01, SOE02, SOE03, SQL01, SQL02, SQL03, SQL04, SQL05, SQL06, WQL10, \*\*WQL16.

### Pastureland - Actual/acre

Not compatible with ANM09, PLT01, PLT06, PLT10, SOE02, WQT06

### Forestland - Actual/acre

Not compatible with PLT01, SOE02

The applicable acres, in which this enhancement will be scheduled, will be based, only on the acres of shallow water habitat established. **A ratio of 1 ac per 100 ac of cropland, pastureland or forestland.** You must identify the actual acreage and location where this enhancement will be adopted.

Additional Guidance for 2011-1
