

PA- Supplemental Guidance

ANM-17 **Monitoring nutritional status of livestock using the NUTBAL PRO System** – The NUTBAL manure sampling and monitoring program will be utilized to analyze the diet of grazing animals and the follow-up computer analysis program will be utilized to make changes in the diet. This sampling will be done once a month in the grazing season per livestock group and/or type.

NUTBAL will be completed by the producer, with the assistance of a consultant.

Pastureland - System/acre
