

PA- Supplemental Guidance

WQL-11 Precision Application Technology to Apply Nutrients – Use of monitoring and current GPS technology to apply fertilizer/nutrients to production acres.

Real Time- has to be in current growing season and the use of this technology has an influence on the current year's crop.

The use of slow release fertilizer with cornstalk tests in the fall do not meet this enhancement.

Cropland – System/acre

Not compatible with ANM21, ANM22, SOE02

Pastureland – System/acre

No compatibility restrictions.
