

PA- Supplemental Guidance

WQL-18 **Non-Chemical Control for Livestock Pest Control** – Use of fly traps, predators, specific known plants located around animal concentration areas, etc to control parasite and pests commonly found in a livestock operation.

Pastureland. – System/acre
Not compatible with ANM23

Forestland - System/acre. Not typically grazed by livestock in PA.
Not compatible with SQL07

The unit in which this enhancement will be scheduled will be based only on the acres used for grazing. You must identify the actual acreage and location where this enhancement will be adopted.

No additional guidance for 2011-1
